

27 June 1980

25X1A MEMORANDUM FOR: []

FROM : PB/NSC Coordinator

SUBJECT : SCC Annual Review of Sensitive Collection (U)

25X1A []

1. Susan mentioned that you already have all the Agency material for this review. I expect to receive all of the DoD material today. Upon receipt I will provide it to you. []

25X1

2. We should endeavor to get the DCI and DDCI their books as soon as possible. If, after they look at this material, they are satisfied, then the DCI can request that Brzezinski schedule an SCC(I) in the near future (because of his leave plans, I think the Director would like to get it out of the way by the middle of July). []

25X1

3. I am not sure where you stand on the compilation of material, but I would be glad to go over it with you at your convenience. Based on the last two reviews, there are a couple of things, other than just the compilation of the inputs, which should be undertaken prior to DCI review. These include:

- a. DCI talking points (in looking at the Director's book from last year these seemed to be missing. Do you have these somewhere?)
- b. The data regarding sensitive cases included/not included, briefed/not briefed, approved/disapproved need to be broken out in several ways for the Director. The best categories to use []

25X1

25X1

(1) Number of cases included in this report (new or on-going with increased sensitivity).

(2) The number of cases included in last year's report but not included in this year's (either terminated or dropped due to decreased sensitivity).

(3) Number of cases briefed to the Chairman--and of these the number not briefed to (a) SecState, (b) SecDef.

25X1

[]
[]

27 Jun 86

- (4) Number of cases briefed to the Chairman and disapproved.
- (5) Examples of cases just above and just below sensitivity line.
- c. For items (1) to (5) above, not only should the quantitative number of cases in each category be noted, but also these cases should be identified by crypt and a brief (one to two sentence) description.
